

Healthy Immune System Support

NK365™

NK365 is an immune support supplement that may help increase your Natural Killer (NK) cell activity and promote a stronger immune system.* Your NK cells are your immune system's first line of defense. The health of your NK cells is critically important to ensure you are protected.

NK cell function can decline with age, poor diet, lack of sleep, smoking and other stresses on the body. Unfortunately, a decline in NK cell function can weaken your immune system.

NK365 is a proprietary blend of vitamins, minerals, and agaricus mushroom extract essential for a healthy immune system and strong NK cell function. NK365 immune support can help you keep your body in fighting condition and ready to fend off foreign invaders with only four capsules a day.

IMMUNE SUPPORT ELEMENTS

Agaricus blazei Powder (1200 mg)†

- Mushroom polysaccharides have been shown to increase NK cell activity
- Contains higher levels of beta-glucan than other medicinal mushrooms

Antioxidants

- Vitamin C, Vitamin E, and antioxidant enzyme cofactors: Selenium, Copper and Manganese
- Contains high amount of antioxidants to protect cells from free radicals

Vitamin B Group‡

- B vitamins essential for carbohydrate energy metabolism
- Contains B1, B2, B6, B12, and Nicotinamide

Zinc Gluconate

- Zinc is a trace element important for normal immune function
- Zinc gluconate has a better absorption rate than zinc oxide

DAILY RECOMMENDED AMOUNT
